## Summary

Now that you have completed the lessons for this module, you should be able to:

- Identify how the key policies, regulations, and guidance influence the evaluation of product support capabilities.

- Differentiate between the roles of the program manager's office and other stakeholders in evaluating product support capabilities.

- Identify the Life Cycle Logisticians' (LCL) role in the management processes associated with evaluating product support capabilities.

- Identify the LCL's role in the technical activities associated with evaluating product support capabilities, including systems engineering, transitioning Joint Capability Technology Demonstrations (JCTD), and ensuring open systems/interoperability.

- Identify life cycle sustainment metrics and how they are developed during the Materiel Solution Analysis Phase.

Module Completion

You have completed the content for this lesson.

At this point you should have completed all of the lessons in this module.

Please take the Module Exam so you may recieve credit for this course.
